A gentle reminder...

Every family sees only part of the picture and every child's context is unique.
Our staff work carefully and compassionately with every child and family,
guided by our school values, professional responsibilities and legal duties.
We are always happy to discuss your own child's experiences and any concerns you may have.
To protect children's privacy and wellbeing, we are unable to discuss other children
or share confidential information about them.

Seeking information directly from school helps ensure that conversations are
accurate, respectful and focused on supporting children.

Thank you for partnering with us.
